

# WHAT FIVE OAKS CONSULTING OFFERS

## OUTCOMES YOU MAY EXPECT

As an NGO/nonprofit or philanthropic leader who wishes to drive dramatic and useful change, you may expect the following outcomes (depending on what service you buy)

You will know how to turbo charge your ability to have impact as a leader

Your team will be more motivated and will be better supported by you

You will know better where to look for skills and personalities within your team (s) to complement your own strengths

You will have more self-awareness about what strengths you bring to the work; what your areas for development are, your blind spots, assumptions and belief systems that may be due for a rethink

You will be in a better position to lead organizational change based on a solid understanding of change leadership and change management principles -- grounded in the actual experiences of international NGOs

You will know how to practically shape your organization's culture so that it aligns with new strategies, supports your organization's expressed values and takes account of changes in the external environment

Your governance structure and mechanism will be better fit-for-purpose: providing your organization with not just fiduciary oversight and strategic insight, but also legitimacy as well as credibility -- while at the same time allowing for sufficient agility. You will feel that you derive value from your governance mechanism(s), in return for what you and the organization invest in it

Your important strategy and planning meetings will be effectively facilitated, resulting in better alignment and actionable outcomes that help the organization pivot when the external environment changes (once again)
